

# FEED Oxford

The FEED (Food and Essentials e-Delivery) an Innovate UK supported project aims to work with two industries that have been significantly affected by the COVID-19 epidemic, namely hospitality and retail; while supporting the community (through the delivery of foods and essentials) and still contributing to preserving the environment.

It also has a catering hub delivering Jollof Kitchen (African cuisine) Greek George (Greek cuisine) and Pub Grub (British cuisine) that can be ordered via our website or apps. All deliveries adhere to promoting zero carbon emissions and social distancing through using an electric car or bike, and we are trialling making the last 2m delivery via drone in order to keep with social distancing guidance.

It's not just  
about the  
quantity. We  
cook to  
create joy.
